The screenshot shows two browser windows. The top window is Docker Hub, displaying the repository page for `uifd/ui-for-docker`. It indicates the repository is deprecated and suggests using Portainer. The bottom window is Docker Playground, showing a terminal session where the `docker pull uifd/ui-for-docker` command is executed. The terminal output shows the image being pulled successfully from Docker Hub. The Docker Playground interface also displays the IP address `192.168.0.13` and provides options to open ports, delete, or edit the instance.
